

BIOGRAPHY

**Samuel
Greaves**

Vice President,
Growth &
Engagement,
Boeing Space
Mission Systems

Former U.S. Air Force Lt. Gen. Sam Greaves is vice president, Growth & Engagement within Boeing Space Mission Systems. In this role Greaves guides the creation of win strategies that meet Long Range Business Plan Goals and that are tailored to the Space Mission Systems' (SMS) diverse portfolio, from ground segments to Low Earth Orbit (LEO) and beyond, focusing on both classified and unclassified missions.

Prior to joining Boeing in 2019, Greaves served for 37 years in the U.S. Air Force. During his Air Force career, Greaves served in multiple engineering, acquisition, operational and command roles supporting numerous space and weapons programs, including the Space Shuttle program; satellite programs; launch vehicle and missile programs; and spacecraft test and launch operations.

Greaves holds a Bachelor of Science degree in Electrical Engineering from Cornell University, a Master of Science degree in Computer Science from West Coast University, and a Master of Strategic Studies degree from the Air War College.

His distinguished career leading federal government-industry teams in a variety of roles garnered significant recognition, including a 2018 Washington 100 Award; the 2017 General Thomas D. White Space Award; the 2017 Peter B. Teets National Security Space Award; the 2016 General Bernard A. Schriever National Space Leadership Award; and the 2008 Lt. Gen. John W. O'Neill Outstanding Program Director Award.
