

STRAW ROCKETS

ADDITIONAL MATERIALS

Markers/Crayons
Scissors
Pencil
Tape
Straw

VIDEO TUTORIAL:

1 // Color the rocket pieces on this page

2 // Cut out and shape the rocket

Cut out the rectangle, the body of your rocket. Wrap it around a pencil length-wise and tape the end so that it forms a tube.

3 // Cut out and attach the fins

Cut out the two fins. Align the bottom of one fin to the bottom of the rectangle and tape each tab to the rocket body. Next tape the other fin to the other side of the bottom of the rocket.

4 // Bend the fins

Bend the four fins until they stick out from the rocket 90°. When you look along the back of the rocket, the four fins should form a "+" shape.

5 // Make the nose cone

Twist the top of the rocket tube into a nose cone around the sharpened end of your pencil.

6 // Go for launch!

Remove the pencil from your rocket and replace it with a straw. Be sure your launch area is clear of people and hazards, then blow into the straw to launch your rocket!
